Technology at work for you

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

The speed of business forces you to manage ever-changing IT Staffing demands. Locating, qualifying and managing the staff to complete complex IT projects is time-consuming and costly. Moreover, as soon as one project is complete, another will inevitably arise; consisting of completely different requirements and skill sets. It's a seemingly never-ending cycle that ultimately distracts organizations from focusing on their primary line of business. SplendTek appreciates the importance of having the Right Resource, at the Right Place, at the Right Time – so you can control costs while maximizing profitability with strategic staffing.

SplendTek gives you a trusted partner who will deliver qualified professional contract and permanent IT staff quickly and efficiently to meet your immediate and long-term business objectives. For more than a decade, SplendTek has been a leading provider of consulting, staff augmentation, and specialty expertise required for critical IT initiatives.

flexible solutions for your business needs

TECHNOLOGY CONSULTING PROVIDES A TOTAL END TO END SOLUTION.

IT STAFFING SOLUTIONS

All of our consultants undergo a comprehensive interview process tailored to your specific needs. SplendTek will go the extra mile to provide highly qualified consultants that blend into your culture and work well with your staff. Our experience enables us to provide agile and cost-effective IT solutions and services. That's why our clients include government entities, Fortune 500 companies, as well as smaller local businesses.

We can support your needs in a variety of different areas and specialties, including Analysts, Architects, Programmers/Developers, Administrators, Managers, Technical Writers, and Designers.

IT SUPPORT SOLUTIONS

- “Just-in-time” staffing solution
- Specific needs staffing solution
- Flexible staffing solution
- Controlled staffing solution
- Value-added staffing solution
- Work completed in contract duration
- Quickly secure high quality candidates
- Significantly reduce the risk of bad regular employee hire
- Increased productivity for IT managers

CUSTOM SOLUTIONS

Whether you are a large investor-owned corporation or a small municipal utility, SplendTek software experts have the real-time programming and advanced, custom software design experience to build applications that meet your unique requirements.

WEB SOLUTIONS

With all our software applications we aim to improve system performance while reducing costs. We also design applications to be flexible and reusable. You can later fine-tune the software for use throughout your utility's system.

EBUSINESS SOLUTIONS

When properly implemented, the Internet will enable you to increase efficiency within your organization, collaborate with your partners and suppliers and better serve your customers. We have discovered "Basic Principles" to achieve "measurable results" from your technology investment.

ENTERPRISE MANAGEMENT SERVICES

Our integrated consulting staff effectively defines market demands, developing a sound course of action, and successfully implementing that course, which are crucial to successfully contend in today's dynamic marketplace.

APPLICATION MANAGEMENT

The success of an enterprise depends mainly on the way its hundreds of applications are managed and run. Applications within an enterprise need to be based on reliable operation and secure control, to ensure that the core organizational functions take place uninterrupted. Be it maintenance of applications, reengineering, migration or testing, administration of the same remains a crucial function within an enterprise. It is imperative that enterprise application management be essentially effective and efficient, to provide the business the fundamental edge to compete.

From maintenance, migration and testing, SplendTek offers a comprehensive set of application management services that help organizations reduce system downtime, enhance performance and concentrate on strategic initiatives.

- Service Delivery Management
- Service Level Reporting
- Staffing and Skills Management
- Infrastructure and Service Availability Management
- Program Management
- Scaling and Growth Management
- Escalation Management and Alerts
